CONTENTS

Nonlinear stability of a stratified shear flow: a viscous critical layer. S. M. CHURILOV and I. G. SHUKHMAN *page* 1

Dynamic simulation of hydrodynamically interacting particles. L. DURLOFSKY, J. F. BRADY and G. BOSSIS 21

Diffraction of sea waves by a slender body. Part 1. The shallow-water limit. J. A. P. ARANHA and M. SUGAYA 51

Transformation invariance of the longitudinal velocity correlation in grid-generated turbulence at high Reynolds numbers. GERALD ROSEN 87

Second-order modelling of a variable-density mixing layer. TSAN-HSING SHIH, JOHN L. LUMLEY and J. JANICKA 93

Analysis of laminar vortex shedding behind a circular cylinder by computer-aided flow visualization. B. E. EATON 117

Characteristics of turbulent flow in slightly heated free swirling jets. J. W. ELSNER and L. KURZAK 147

Vortex excitation of rectangular cylinders with a long side normal to the flow. YASUHARU NAKAMURA and TOHRU MATSUKAWA 171

Eduction of large-scale organized structures in a plane turbulent wake. A. K. M. FAZLE HUSSAIN and M. HAYAKAWA 193

Rough-wall turbulent boundary layers in the transition regime. PROMODE R. BANDYOPADHYAY 231

Fast dynamo action in a steady flow. A. M. SOWARD 267

Waves due to a steadily moving source on a floating ice plate. Part 2. R. M. S. M. SCHULKES, R. J. HOSKING and A. D. SNEYD 297

Streaming from a cylinder due to an acoustic source. N. RILEY 319

The role of the buoyancy layer in determining the structure of salt fingers. GEORGE VERONIS 327

A bifurcation study of laminar flow in a curved tube of rectangular cross-section. KEITH H. WINTERS 343

Weakly nonlinear non-symmetric gravity waves on water of finite depth. J. A. ZUFIRIA 371

A non-local description of advection–diffusion with application to dispersion in porous media. DONALD L. KOCH and JOHN F. BRADY 387

Some new aspects of the shock-wave/boundary-layer interaction in compression-ramp flows. J. ANDREOPOULOS and K. C. MUCK 405

On the motion of linearly stratified rotating fluids past capes. Don L. Boyer and Lijun Tao 429

Resonant reflection of shallow-water waves due to corrugated boundaries. Sung B. Yoon and Philip L.-F. Liu 451

On the integral relationship for mean angular momentum of gravity waves in finite-depth water. Zhouwen Yu and Jin Wu 471

The rheology of dilute suspensions of slender rods in weak flows. Douglas H. Berry and William B. Russel 475

Creeping flow in two-dimensional channels. C. Pozrikidis 495

A study of peristaltic flow. C. Pozrikidis 515

Criteria for the selection of stochastic models of particle trajectories in turbulent flows. D. J. Thomson 529

A note on the stability of a family of space-periodic Beltrami flows. D. Galloway and U. Frisch 557

Corrigendum 565
